

We are happy to share the latest achievements from Tech4Gov in the month of December! Our dedicated team's unwavering commitment has resulted in the successful completion of projects, strengthening our relationships with clients and partners. We express our heartfelt gratitude for your continuous support, and we are resolute in our commitment to achieving excellence. Stay tuned for further updates and groundbreaking developments as we persistently push the boundaries of innovation at Tech4Gov!

Milestones – December'2023

Services :

1. Successful Field testing of newly developed ICDS app i.e **BADI** at Various AWCs of Patna Sadar and reported to ICDS Director Sh. Kaushal Kishore, IAS and also implemented bi-lingual i.e. Hindi and English option for End-User.
2. The BHY Portal has been effectively deployed on the SDC (State Data Center) server, and the RBSK (Rashtriya Bal Swasthya Karyakram) team has been recommended to conduct testing before the official launch.

Products :

1. The meticulously crafted work plan for the Intervention segment within the Supply Chain Management Program has been intricately presented to distinguished entity i.e. BMGF.

Highlights – December'2023

In addition to the mentioned milestones, the Tech4Gov team had also diligently worked on the following items:

1. We have visited the Regional Warehouse in Muzaffarpur with the aim of comprehending the primary operational and functional challenges faced by the facility. This hands-on approach was crucial for gaining insights into the specific issues that may be impacting the warehouse's efficiency and functionality.
2. **Mr. Manish** provided exclusive support to the Assam team in restarting the portal and its associated services before its official launch. Additionally, Ms. Nitika

3. conducted thorough testing of the PGR portal.
3. An online training program has been successfully conducted for all Nodal Officers on the Public Grievance Redressal System, which is set to be implemented statewide across Assam. The training program was a critical step in preparing Nodal Officers to effectively manage and address public grievances, contributing to a more responsive and efficient governance system in Assam.
4. **Mr. Sourav** has actively collaborated on the **Sukritya** app, addressing and resolving bugs. The app is utilized for conducting surveys on HR and infrastructural details of Health and Wellness Centers (HWCs) throughout the state.
5. In addition to his responsibilities related to the ICDS App and portal development, **Mr. Chandan** has undertaken the task of creating modules for the execution of transfer requests by designated officers under the Teacher Transfer Portal in Jharkhand. This highlights Mr. Chandan's multifaceted role, demonstrating his involvement in enhancing and expanding functionalities within the education system, specifically addressing the process of teacher transfers through the development of specialized modules for efficient execution.

Moments of the Month

- **Mr. Rupesh & Mr. Mayank** from our team took part in a workshop conducted by the e-Gov Foundation. The two-day event, held on December 14th and 15th, 2023, addressed the following key areas:
 1. Insights from the past year's experience working with e-Gov.
 2. Conceptualization of the Pragati project.

Additionally, the E&Y team joined the workshop on the second day.

- The newly developed Integrated Child Development Services (ICDS) app, known as **BADI**, underwent successful field testing at the Adalatgang Anganwadi Center (AWC) in Patna Sadar. The positive outcome of the field testing suggests that the app performed well and met the intended objectives during its trial at the mentioned location. This successful field testing is a significant milestone, indicating the readiness of the **BADI** app for broader implementation and use within the context of the ICDS program.
